

AHMED SAMY

Junior Penetration Tester | Bug Bounty Hunter

Alexandria, Egypt | +20 112 489 0707 | ahmedsamyaminhamed@gmail.com [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Junior Penetration Tester and Bug Bounty Hunter with expertise in web application security, API testing, and vulnerability assessments. Skilled in identifying OWASP Top 10 vulnerabilities, authorization flaws, and business logic errors. Adept at reconnaissance, exploitation, and delivering structured vulnerability reports to improve organizational security posture.

TECHNICAL SKILLS

- **Web Security & Exploitation:** OWASP Top 10, IDOR, SQL Injection, XSS, CSRF, Broken Access Control, Business Logic Flaws.
- **Offensive Tools & Recon:** Burp Suite, Nmap, Metasploit, Subfinder, Amass, Httpx, FFUF, Nuclei, Wireshark, ZAP.
- **Programming & Scripting:** Python, C++, [Chttps://www.google.com/search?q=%23](https://www.google.com/search?q=%23), JavaScript, Dart, OOP.
- **Systems:** Linux Administration.

EXPERIENCE

Cyber Security Trainee | *Cyberthos Nov 2025 – Feb 2026*

- Completed hands-on penetration testing training focused on real-world assessment workflows.
- Conducted reconnaissance, enumeration, and vulnerability analysis in simulated lab environments.
- Drafted professional vulnerability reports detailing exploitation techniques and actionable remediation steps.

Cyber Security Trainee | *Digital Egypt Pioneers Initiative (DEPI) Jun 2025 – Dec 2025*

- Executed lab-based vulnerability assessments and web application security testing aligned with the OWASP Top 10.
- Identified, exploited, and documented security flaws using industry-standard reconnaissance and exploitation tools.
- Gained practical experience in penetration testing, networking fundamentals, and Linux administration.

Cybersecurity Instructor (Volunteer) | *GDG Future Academy Oct 2025 – Present*

- Delivered foundational cybersecurity and penetration testing workshops to 50+ students.

- Designed and guided hands-on labs to build students' practical offensive security skills.
- Simplified complex topics including OSINT, web vulnerabilities, and networking concepts.

BUG BOUNTY & PROJECTS

Authorization & Entitlement Bypass Vulnerability | Validated by HackerOne triage team
(Pending review)

- Discovered a server-side authorization flaw enabling Free-tier users to access premium features.
- Bypassed backend entitlement enforcement via direct API requests to access restricted security scanning and secrets management functionalities.
- Validated the exploit via full HTTP request/response analysis, classifying the impact as Privilege Escalation.

Custom Recon Automation Tool | *Python* | [recony-v2](#)

- Automated subdomain enumeration & HTTP probing pipeline.
- Integrated Subfinder, Amass, Httpx for scalable recon.
- Reduced manual recon time by ~60%.

EDUCATION

Bachelor's Degree in Computer Science and Engineering *Future Academy, Egypt* |
Expected May 2026

CERTIFICATIONS & LABS

Certifications:

- Penetration Testing Student (eJPTv2 Prep) (2026)
- Infrastructure & Security VAPT (DEPI, 2025)
- HCIA-Datacom V1.0 (2025)
- Computer Network Fundamentals (2025)
- Front-End Web Development (2023)
- SQL Fundamentals (2023)

Practical Labs & Platforms:

- **TryHackMe:** Top 15% globally; completed 41 rooms (Web Fundamentals, Nmap Mastery, Linux).
- **PortSwigger Academy:** Solved 60+ labs (Apprentice/Practitioner) covering SQLi, XSS, IDOR, Path Traversal, and Auth Bypasses.
- **HackTheBox:** Hands-on CTF practice focusing on real-world exploitation techniques.

COMPETITIONS

- **Egyptian Collegiate Programming Contest (ECPC):** Participant (2023 & 2024)
